<p><b>Suggested Measures:</b> Documentation of school administrator requests for information (e.g., emails, memos) to the district office, roster of SWDs in school's zone who are not attending the school.</p> <p><b>Note:</b> Aligns with District BPIE Indicator #3. This indicator addresses the practice of placing SWDs in schools based primarily on exceptionality, label or services needed, rather than identifying and allocating resources for all SWDs to receive educational services in their neighborhood school or school of choice. Students who are transported to attend other schools are at risk of disenfranchisement from the communities within which they live and lack opportunities to build natural relationships among the students in the assigned school. With the practice of placing SWDs at schools based on their exceptionality, unintended consequences include further isolation of students with significant disabilities and barriers to scheduling SWDs into heterogeneous classrooms that have natural proportions of students with and without disabilities. Please see the Appendices: Glossary of Terms section for definition of the above term natural proportions.</p> <p><b>Comments:</b></p>

**Suggested Measures:** Student schedules, organizational rosters, list of adaptive equipment; observations of students with and without disabilities in non-academic contexts, e.g., recess, in between class and school social gatherings; surveys, focus groups or interviews of students with and without disabilities

**Note:** Aligns with District BPIE Indicator #21. For many students with disabilities, especially those with more significant disabilities, learning purposeful skills in the context of meaningful and inclusive activities is critical to practicing, maintaining and generalizing what they learn across a range of natural settings and situations. Educators should consider non-academic activities when identifying opportunities to develop essential skills such as using money, ordering food, reading, speaking and asking for assistance when needed in natural contexts, with non-disabled peers. School-sponsored, non-academic activities also provide opportunities for students with significant disabilities to interact and develop relationships with same-age peers without disabilities.
