

Cultural Awareness

Broward Schools serves students and families from various countries and cultures. Identify school practices that demonstrate how the values and traditions of the diverse community are incorporated in your school's culture. (ex. serving dishes from a particular culture during school events; acknowledging traditions and holidays; communications and signage in different languages, etc.)

Culture:

Latino or Hispanic

How is the school acknowledging this culture?

Our teachers participate in a wide variety of activities that relate to Hispanic Heritage Month in class. Some teachers assign student projects and others implement district-approved lessons and activities.

Also, some staff members even go as far as sharing and serving dishes from a particular culture during school events; acknowledging traditions and holidays; communications and signage in different languages, etc.
