THE GOAL

Understand what the Unit 1 assessment reveals about student learning and use those findings to make immediate instructional decisions.

*What did students master?
Where did breakdowns occur?
What will we do next?*

Review grade-level and individual class proficiency results.

Identify each teacher's lowest-performing standards.

Analyze assessment items and likely student misconceptions.

Plan targeted whole-group, small-group, or individual responses.

Establish a CFU to determine whether reteaching worked.
