FACE Space SIP Plan 2026-2027

The Family and Community Engagement (FACE) Space will be prominently located at the front office windows, creating a welcoming and highly visible hub for information and resources. As parents, teachers, students, community members, and other stakeholders enter through the main entrance, they will immediately see the FACE Space and have access to important school and district information. The area will feature updates on upcoming events, volunteer opportunities, academic resources, family workshops, school initiatives, community partnerships, and other announcements that support student success. By placing the FACE Space in a central location, Meadowbrook Elementary will strengthen communication, increase family engagement, and ensure that all stakeholders have easy access to timely and relevant information.
