

Glades Middle School's FACE Space is currently a **work in progress**. The project required a two-stage approach to ensure that both the mandatory district information and the FACE Space resources are properly displayed.

Stage 1 – Required Information Board: An additional bulletin board was created to accommodate the mandatory district flyers and required school information. This stage was **completed today**.

Stage 2 – FACE Space Board: The overall design and layout of the FACE Space have been completed, and the individual design elements and resource sections are currently being placed and arranged on the board. The technology component is still being finalized; once resolved, I will be able to generate the QR code that will provide families with direct access to the online FACE resources.

The project is progressing as planned, with Stage 1 complete and Stage 2 currently underway.
