- ❖ Accountability Funds (\$7080.69)
 - Voting: Accountability Funds Usages
- ❖ School Environmental Safety Incident Reporting (SESIR)
- ❖ Title 1 Update
- ❖ Next SAC Meeting: March 26, 2026

Supporting Mathematics, One Day at a Time — Be Better! In middle school, math focuses on problem-solving, reasoning, and real-world application. Families can support learning by connecting math to everyday activities. Have your child help create a small budget, compare prices, calculate tax, or find the best deal. Discuss sports stats or social media percentages and ask what those numbers really mean. When shopping, challenge them to calculate discounts and final prices. You can also build math skills through time management; if they have three assignments and 90 minutes, how should they divide their time?

Speak Excellence. Model Excellence. Achieve Excellence.

Excellence is the Expectation!
