School Advisory Forum Minutes

SAF Minutes: Security was the focus of the past month's meeting:

- The Raptor Systems will be receiving upgrades soon.
- Visitors must continue to be screened, and visitors must show ID to front office.
- A reminder was given that Florida law states instructional doorways must be locked at all times.
- A weak point in school security is subcontracted vendors needing to be ID'd.
- Security is looking to install detectors in middle/high school restrooms using electronic dots to show the number of students in the restrooms and how long they are in there for.
- Panic alert systems will eventually be installed in school front offices.
- Schools should have at least one resource officer (SRO) in each school, or armed security.
- No weapons are allowed on school campuses regardless of open carry licenses.
- School security guard turnover is high – looking to enhance incentives to entice them to stay.

SAF adjourned at 2:52 PM.
